The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

i,

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Election/Restrictions

2. Applicant's election without traverse of Species I- Figures 1 and 2 in the reply filed on 7/10/06 is acknowledged. The Applicant asserts that claims 1,2, 4, 6-9, 11, 12, 14 and 18-20 are drawn to the elected species. The Examiner respectfully disagrees. The subject matter of claims 4, 9, and 14 is only found in the embodiments disclosed in Figures 3-5. In summary, Claim 3-5, 9, 10, and 13-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the detent of claim 19 and the three dimensional vaporization of claim 18 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure

Application/Control Number: 10/791,176

Art Unit: 3616

is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112: 4.

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claim 18 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The disclosure regarding the cable formed by three dimensional vaporization is insufficient to indicate possession. On what surface is it vaporized, what portion is vaporized? How are the connections executed?

Application/Control Number: 10/791,176 Page 4

Art Unit: 3616

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 2, 12, and 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. These claims incorrectly characterize the cable line as a cable harness.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 9. Claims 1, 6-8, 11, 12, 19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Gras Tous et al. (EP 1 172 256 A2), cited by the Applicant. Gras Tous teaches a generator carrier (5) with an outer wall. Please note that it is the Examiner's position that the broadest reasonable interpretation includes housing 5 of Gras Tous as a generator carrier, since it carries the airbag module, and as such must carry the generator. Also taught is a function module (9a, 9b) that has a plug in contour 8a that fits into an insert contour (see figure 1) of the outer wall. The function module is a switch module (see col. 22, line 57) and is an electronic module (see col. 4, line 3.) Regarding claim 19, a detent is provided (20a) is provided.

Claim Rejections - 35 USC § 103

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

11. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gras

Tous et al. (EP 1 172 256 A2) in view of Castleman et al. (US 6,131,946.) Gras Tous et
al. is discussed above, and does not discuss the details of the cable between the carrier
(5) and the steering wheel hub. Castleman teaches that it is known to provide a guide
and that such a guide facilitates connecting the connectors between the hub and the
carrier (see col. 4, lines 19-24.) It would have been obvious to one having ordinary skill
in the art at the time of the invention to include a cable guide to facilitate the connection
during installation.

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. XU et al, Adams et al., Ibe et al., Nishijima et al. Chen, and Bostic et al. teach steering wheels of interest.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ruth Ilan whose telephone number is 571-272-6673. The examiner can normally be reached on Monday-Friday, 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Dickson can be reached on 571-272-6669. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
